Dr. David Manney
Dept. Zoology
University of Michigan
Ann Arbor, Mich.

Dear Dave:

This is the ms. that we talked about— see pp. 23-27, especially, for a reference to the H1:H2 story. The ms. was given at the Growth Symposium at Amherst last Spring, and will be published by the University of Princeton Press, probably under the editorship of Dorothea Rudnick.

This seems to be the only copy I have now and I would appreciate your returning it as soon as you can. Thanks,

A handwritten signature, likely of the sender, is located in the lower right portion of the letter. The signature is written in cursive and is somewhat stylized, appearing to start with a large 'J' or 'M'.
